

# DP SIRENS

Signaling and safety in only one equipment developed for places where dangerous situations must be avoided.

This device is an electromechanic siren with an injected ABS structure that is corrosion-resistant and its final touches generate bigger sound pressure.

## Technical Characteristics

Model	DP 300 / 1000
Voltage	24VCC/24VCA/110VCA/220VCA
Frequency	50~60Hz
Dimension	138x98x85mm / 172x135x120mm
Weight	650g / 700g (liquid)
Material	ABS

IÇAMENTO E MOVIMENTAÇÃO DE CARGA

### ► Solution for:

- Cranes;
- Doors;
- Machines;
- Hoists;
- Time clock
- Etc.

### ► Resources and benefits

- Corrosion resistance;
- Sound range of 300 to 1000 meters;
- 105 dB to 1 meter;
- Intermittent use up to 15 minutes;
- It can be directly plugged in the power outlet;
- Time programmer;
- Safety in the process;
- Compact;
- Environment signaling;
- Movement signaling;
- Etc.

### ► Technical Assistance (Seyconel)

We assist all over Brazil through the sending of products to our headquarter (Colombo - PR)
